Experience

Data analyst

MAG Interactive

📅 November 2021 –

🕒 ongoing

📍 Stockholm, SE

- Owning and improving data models and analytics pipelines using dbt, BigQuery and Airflow, ensuring reliable data for product and business decisions.
- Collaborating with product stakeholders on experiment design, analysis and interpretation of A/B tests, turning them into actionable insights.
- Developing and maintaining attribution data models for the user acquisition and management teams, including ROAS/ROI projections used to evaluate campaign performance and investment decisions.
- Building and maintaining Tableau dashboards tracking product and business KPIs for stakeholders ranging from management to game designers.

Postdoctoral researcher

NCSR Demokritos

📅 November 2019 – April 2021

🕒 1y 5mo

📍 Athens, GR

- Data processing for device performance monitoring.
- Designing lithographic mask layouts and overseeing the fabrication process to maximize sample throughput.

Ph.D. researcher

KTH Royal Institute of Technology

📅 Jan 2012 – June 2019

🕒 7y 6mo

📍 Stockholm, SE

- Hands on research on highly doped SiGe alloys for low resistance MOSFETs, fabricated in low temperatures to enable monolithic 3D integration.
- Extracting, transforming and visualizing data for high level exploratory data analysis.
- Presenting research results in academic journals and international conferences.
- Technical and academic supervision for several master level student theses.

Education

Ph.D. in Electrical Engineering

KTH Royal Institute of Technology

📅 Jan 2012 – June 2019

📍 Stockholm, SE

M.Sc. in Nanotechnology

KTH Royal Institute of Technology

📅 Sep 2009 – Dec 2011

📍 Stockholm, SE

B.Sc. in Physics

National and Kapodistrian University of Athens

📅 Sept 2001 – June 2009

📍 Athens, GR

About me

Physicist turned data analyst. PhD in Electrical Engineering, with a strong statistical background in product analytics, experimentation and data modeling.
